

## Project Overview

As of April 3, 2013

Existing conditions on SR 161

## SR 161 Shared Use Path

**Description and benefits:** The proposed 10-ft. wide shared-use path would provide safe and attractive connections for bicyclists and pedestrians living and traveling along State Route 161 between Linworth and Sawmill Roads. This project was identified by the Northwest Area Plan (adopted by City Council on October 22, 2007) and is one of the top 12 priorities of the Bicentennial Bikeways Plan (adopted by City Council on June 9, 2008).

The 2.2 mile path would be separated from State Route 161 by up to 30-ft. of green space along most of the corridor. In the more urbanized Linworth area, the right-of-way narrows and the speed limit drops to 35 mph, so the shared-use path would be closer to the roadway.

**Schedule:** This project is in the preliminary engineering and environmental documentation phase. Final engineering and design are slated for 2013, followed by right of way purchase in 2014 and 2015. Construction will likely take place in 2016..

### Costs:

Design	TBD
ROW acquisition	\$826,848 (estimated)
Construction and inspection	\$1,762,842 (estimated)
